## Improving Care & Outcomes

Friday 9th December 2022

Hallam Conference Centre, London & Virtual Conference

10% credit card discount\*\*  
15% group booking discount\*\*

***“A broken hip or ‘hip fracture’ is a serious injury, which each year in the UK leads to around 75,000 people needing hospital admission, surgery and anaesthesia, followed by weeks of rehabilitation in hospital and the community. Since the injury typically affects older people, it is a particular challenge for those with pre-existing physical and mental health problems”***

National Hip Fracture Database Report September 2022

***“Hip fracture care is affected by, and impacts on, the wider hospital”***

National Hip Fracture Database Report September 2022

***“Enormous variation in the quality and outcome of care persists around the country and this will only improve if all hospitals establish effective governance and QI linked to their NHFD data.”***

National Hip Fracture Database Report September 2022

***“Despite attempts to reduce temporal variation, an ‘evening’ and ‘weekend’ effect still exists, providing impetus for more attention to be paid to these times of presentation”***

National Hip Fracture Database Report September 2022

This important and timely conference will focus on improving care for hip fracture patients – learning from the NHFD findings and September 2022 report, and improving progress against the Key Performance Indicators and NICE quality standard for hip fracture. Through national updates and practical cases studies the conference will highlight best practice in hip fracture care, improving the care pathway and outcomes.

This conference will focus on improving assessment, minimised delays to theatre, improving the pathway from falls to theatre changing the role of the emergency department, ensuring hip fracture patients are prioritised for surgery, overcoming contra indications, improving the anaesthetic and surgical pathway, and ensuring prompt mobilisation after surgery. There is a focus on improving practice against the Key Performance Indicators, using a Quality Improvement (QI) approach, and managing Hip Fracture in Covid-19 positive patients.

This conference will enable you to:

- Network with fellow delegates working to improve services for Hip Fracture
- Learn from the highest performing trusts in the UK as recognised by the National Hip Fracture Database
- Understand and reflect on how you can improve practice, outcomes and reduce mortality locally as a result of NHFD findings released in September 2022
- Update your knowledge on national developments and reflect on the challenges of the Covid-19 pandemic
- Reduce variation and improve practice against the Key Performance Indicators
- Reflect on how can we get this patient to surgery? Understanding and reducing medical complications, avoidable inefficiencies and unacceptable reasons for delaying theatre (including delays out of hours and at weekends)
- Identify key strategies for improving the anaesthetic and surgical care pathway for hip fracture
- Using Quality Improvement to improve Hip Fracture care
- Understand on how you can improve care for Hip Fracture patients beyond the hospital setting
- Develop practical strategies for assessing, reducing, recognising and treating delirium and confusion
- Improve physiotherapy rehabilitation after hip fracture: ensuring prompt mobilisation after surgery
- Reduce mortality in the fractured neck of femur pathway
- Self assess and reflect on your own practice
- Supports CPD professional development and acts as revalidation evidence. This course provides 5 Hrs training for CPD subject to peer group approval for revalidation purposes

**100% of delegates from our last Hip Fracture Summit would recommend this conference to a colleague.**

## 10.00 Chair's Introduction & Welcome / Improving Hip Fracture Care and Outcomes

### Prof Cameron Swift

*Emeritus Professor, Consultant Physician, Kings School of Medicine  
Chair NICE Guideline Development Group for Hip Fracture (CG124)  
Lead/specialist Participation Quality Standard Development  
Member NHFD Advisory Committee*

- learning from the national database and implementing improvement at a local level
- key recommendations from the National Hip Fracture Database
- monitoring adherence to the NICE Quality Standard: what's working well and what's not?
- identifying variation in length of stay for Hip Fractures
- monitoring the impact in your service
- ensuring that the clinical leadership is in place to deliver and audit high-quality care

## 10.45 Hip Fracture Care and Covid-19: Lessons Learned

### Dr Louis Koizia

*Consultant Geriatrician  
Imperial College NHS Trust*

- how do we ensure safety for the frail elderly in our hospitals
- managing patients with hip fracture and Covid-19
- minimising delays to theatre due to medical complications
- lessons learned from the Scottish Hip Fracture Audit

## 11.25 Comfort Break & Virtual Networking

## FOCUS: Lessons from the top performing Trust in England in terms of best practice in Hip Fracture as identified by the NHFD

## 11.45 EXTENDED SESSION: Using National Audit to improve Hip Fracture Care Locally

### Dr Konrad Wronka

*Hip Fracture Lead Consultant  
West Suffolk Hospital NHS Foundation Trust*

- meeting the NHFD Key Performance Indicators
- how do you convince your board to give the highest priority to hip fracture patients?
- ensuring the sicker, older, frailer patients are at the top of the surgical list
- how we have reduced delays in surgical operations as a result of avoidable inefficiencies in preoperative planning or in the organisation of theatre lists
- impact of Covid-19: changing practice
- using audit data to monitor care and prompt change
- using RCA to investigate and understand causes of breaches
- teamwork and implementation
- evaluating the impact of service change

## 12.30 Small Breakout Groups

## 12.50 Lunch Break & Virtual Networking

## 13.30 Reducing unwarranted variation in the Delivery of high Quality hip fracture services in England and Wales

### Prof Celia Gregson

*Professor in Clinical Epidemiology  
Bristol Medical School*

- discover how Artificial Intelligence can be used to support Emergency Care, Radiology and Orthopaedics diagnose hip fracture cases on x-ray imaging
- hear about our clinical study which showed Radiobotics fracture detection algorithm enabled clinical staff to reduce missed hip fractures x-ray cases by almost 50%
- challenge RBfracture with your difficult to diagnose cases today

## 14.00 Improving the Surgical Care Pathway for Hip Fracture

### Mr Martyn Parker

*Consultant Surgeon  
Peterborough and Stamford Hospitals NHS Foundation Trust*

- improving surgical care for hip fracture
- understanding and monitoring mortality data
- the most important factors in improving outcomes
- hip fracture and the palliative care patient
- our experience

## 14.30 Small Breakout Groups

## 14.45 Comfort Break & Virtual Networking

## 15.00 The Impact of early mobilisation and improved rehabilitation

### Rene Gray

*Senior Physiotherapist  
James Paget University Hospitals NHS Foundation Trust*

- Utilising the whole MDT to increase early mobilisation following fragility fracture and surgical repair
- What factors impact upon early mobilisation following hip fracture surgery?
- Using an integrated therapy approach and MDT decision point to improve rehabilitation and length of stay in the acute setting

## 15.30 How has the Covid-19 pandemic affected the baseline physical ability of patients presenting to hospital with hip fracture

### Peter Eckersly

*Physiotherapist  
Manchester University NHS Foundation Trust*

- the impact of dedicated nutritional support on recovery
- our experience
- the collaborative approach to scaling up improvement

## 15.45 Reducing delirium after surgery

### Madhavi Vindlacheruvu

*Consultant Orthogeriatrician  
Cambridge University Hospitals NHS Foundation Trust*

- improving routine screening to prevent confusion and delirium following hip fracture surgery
- meeting Key Performance Indicator 5: Not delirious when tested after operation
- improving staff confidence in reducing, recognising and treating delirium

## 16.15 Close

*There will be time for Questions and Answers after each session*
