shared with full permission to use contents and images

How long will my injury take to heal?

This normally takes approximately 12 weeks to heal. You may find it continues to be a bit achy and swollen for a few months after your injury.

How long will it take for the pain and swelling to settle?

Keep your finger neighbour strapped to the finger next to it. Swelling is often worse at the end of the day and elevating it will help. Taking pain medication and using ice or cold packs will help. Use your normal painkillers or painkillers given to you in the emergency department. If these do not feel enough contact your GP or pharmacist.

More information is on the next page.

Early movement and exercise:

You can strap your fingers together for comfort, make sure the strapping doesn't cover the joint so you can still move the finger. It is important to keep the finger bending to stop then becoming stiff. Follow the exercises on the next page.

Avoid loading this finger for the first six weeks. You may use the hand but keep within normal pain limits.

Whom should I contact if I have any Questions?

If you are concerned about your symptoms or are unable to follow this rehabilitation plan, please contact the Virtual Fracture Clinic team.

Caring for your injury: Week 1-2

Keep your finger neighbour strapped to the finger next to it.

Using a cold pack may help with your pain and swelling. You can use an ice pack or bag of frozen peas wrapped in a damp towel. Apply this to the sore area for up to 15 minutes, every few hours. Make sure the ice isn't in direct contact with your skin.

Exercises:

Follow the exercises below without causing too much pain. This will ensure your hand and wrist do not become too stiff. These exercises will help the healing process.

Initial Exercises:

Do these exercises several times a day. To start with you may not have full movement, gently encourage the movement as pain allows.

Try to touch the tip of your thumb to your fingers.
Repeat five times.

Bend and straighten all the joints in your fingers as shown.

Do not force the movement, work within your limits.
Repeat five times.

Caring for your injury: Week 3-5

You may remove the neighbour strapping. Begin using the hand for normal tasks but be guided by your pain levels. Start the stage 2 exercise.

Use your other hand to keep your finger steady and bend and straighten the finger joint nearest your palm.

Repeat five times.

Use your other hand to keep your finger steady and bend and straighten the finger joint nearest the end of your finger.

Repeat five times.

Caring for your injury: From Week 6

The injury has healed.

You can return to normal activity but be guided by any pain you are experiencing. Carry out day to day activities.

Heavy tasks or lifting may still cause some discomfort and swelling.

Frequently Asked Questions

I'm concerned about my symptoms and/or I am struggling to return to exercise.

Please contact the Virtual Fracture Clinic.

When can I start driving?

You can return to driving when:

- You can comfortably turn the wheel
- You can perform all emergency procedures pain free
- You are covered by your insurance company

Always test your ability to drive in a safe environment first

How can I get a certificate for work?

You can get a fitness for work statement from the Virtual Fracture Clinic Team or your GP.

How do I contact the Virtual Fracture Clinic?

Telephone 01493 452295 or email vfc@jpaget.nhs.uk

Your Feedback

We want your visit to be as comfortable as possible - talk to the person in charge if you have any concerns. If the ward/department staff are unable to resolve it, then ask for our Patient Advice and Liaison (PALS) information. Please be assured that raising a concern will not impact on your care.

Before leaving please complete a Friends and Family Test feedback card.

Help us transform NHS services and to support patient choice.

OUR VALUES

Collaboration

We work positively with others to achieve shared aims

Accountability

We act with professionalism and integrity, delivering what we commit to, embedding learning when things do not go to plan

Respect

We are anti-discriminatory, treating people fairly and creating a sense of belonging and pride

Empowerment

We speak out when things don't feel right, we are innovative and make changes to support continuous improvement

Support

We are compassionate, listen attentively and are kind to ourselves and each other

The hospital can arrange for an interpreter or person to sign to assist you in communicating effectively with staff during your stay. Please let us know.
